Summary

Aspiring data science and ML engineer with hands-on experience building end-to-end deep learning pipelines using Python, TensorFlow, and Scikit-learn. Developed a Parkinson's Disease detection system achieving 94% accuracy (CNN+LSTM) with sub-2 second inference on Streamlit. Strong foundation in feature engineering, model evaluation, and data preprocessing, with additional experience applying clustering and regression to real world recommendation problems. CGPA 8.41 | Top 100, Smart India Hackathon

Skills

Languages: Python (primary), C++, Java, SQL

ML/DL: TensorFlow, Scikit-learn, Neural Networks, CNNs, Computer Vision, LLM, NLP, Pytorch, RNN, LSTM, GenAI, Deep Learning

Data: Pandas, NumPy, Data preprocessing, Feature engineering, Model evaluation, K-Means, Logistic Regression, MySQL, PostgreSQL

Deployment: Streamlit, REST APIs

Tools: Git, Google Analytics, Jupyter, VS Code, Docker

CS Fundamentals: Data Structures & Algorithms (Arrays, Trees, Graphs) – scored 10/10 credits in DSA and DAA, OS, CN

Projects

Neuroscan, *Parkinson's Detection System*

Deep Learning · Computer Vision

- Engineered a **multimodal AI-based Parkinson's disease detection system** integrating **3** diagnostic modalities and **4** deep learning models for automated clinical assessment.
- Developed and evaluated **CNN** and **CNN-LSTM** architectures with multimodal feature fusion, achieving **94% accuracy**, **93% precision**, and **0.93 F1-score**.
- Designed an end-to-end **Streamlit** application using **Python**, **TensorFlow**, **OpenCV**, and **REST APIs** for real-time inference, visualization, and explainable AI through **Grad-CAM**.

Interngo, *PM Internship Recommendation System*

ML pipelines · Model evaluation

- Created a recommendation system for product management internships in a team of **3**
- Applied **data processing**, **K-Means clustering**, and **Logistic Regression** to categorize internships and classify opportunity quality
- Evaluated using **R² score** and **confusion matrix** (83.9% data quality score)
- Contributed to a project that included a web interface built using **Flask**, **HTML**, and **CSS**

Education

08/2024 – Present
Greater noida

B.Tech in Computer Science, *Bennett University*
CGPA - 8.41, SGPA - 8.74
Scored 10/10 credits in DAA, DSA and OS

Professional Experience

09/2024 – 08/2025
Bennett University

Social media team member, *Fullstack club Bennett University*

- Led **content operations across 2 social media platforms**
- Curated multimedia content across **Instagram** and **LinkedIn**, which captured **500+** followers in a quarter.
- Drove **~30% increase in audience engagement**
- Designed high-performing visuals and captions using **Canva** and **Instagram Insights**

06/2026 – 08/2026
work from home

Software Developer Intern, *Calyb AI, Bangalore*

- Tested **Conversational AI (Chat-to-Data)** workflows by integrating **LLMs**, **SQL**, and relational databases across **10+** database tables and **100+** natural language prompts.
- Created **Metadata** for **JIO insurance** and worked with real life dataset by installing it in a recommendation system.
- Debugged backend workflows, SQL execution, and **API integrations** while validating **100+** AI-generated queries across **20+** testing iterations.
- Built and evaluated AI-powered data solutions using **Python**, **SQL**, **Docker**, **Git**, and **Prompt Engineering**, contributing to **3+** core workflow modules.

Additional information

Languages

Hindi, English, Spanish (fluent)

Certifications

- BCG Data scientist virtual internship - Forage
- Software Engineering - NPTEL
- Generative AI - Google
- Operating system - Google

Awards

Top 100, Smart India Hackathon (SIH)
